EXPERTISE

With 34 years in commercial lighting & programmed maintenance I have excelled in delivering solutions for large body corporates, fitouts, groups, schools and similar. In 2013 I decided to specialize in upgrades for existing buildings and formed Active Lighting to deliver for this.

SERVICES

Full Lighting Audit
ROI on current upgrade
Emergency Lighting Design (PS1)
Full Electrical Services
Supply of Material (at competitive prices through relationships built over 34 years in the industry)
Project Management

INTRODUCTION

Design + Supply + Install of Retrofit LED's, lights designed to replace conventional light sources, such as incandescent lamps, CFL, halogen, fluorescent, mercury vapor, metal halide quickly and easily. The term Retrofit means modernizing your light which fits existing sockets/fixtures easily.

LED Upgrade's using LED fittings to replace conventional fittings with similar light output, colour and distribution. This applies to all interior and exterior fittings. For existing buildings, it is more sustainable to have a 'Turnkey' approach.

EXPERIENCE

COUNTDOWN | 1992-97
